

Advanced encryption and security standards

From TLS encryption and security compliance to our continuous commitment to a secure environment, Hubly delivers a secure messaging API and infrastructure.

Secure cloud infrastructure

All files are saved with AES256 encryption in our private cloud and access is tightly restricted.

Hubly conducts regular third-party penetration testing to proactively ensure security and address potential vulnerabilities.

Security and Compliance

Hubly and Hubchat is SOC 2, ISO 27001, HIPAA/HITECH, as well as GDPR compliant.

Security on the go...

All communication to and from Hubly servers is encrypted using TLS/SSL with authentication devices for client- and server-side.
